## A Few of Our Favorite Things

*Location: 1st floor - entrance near northwest restrooms.*

From aerosol cans to zippers, these are 100 things that shaped people's lives in the past 100 years. Unlike other exhibits, each of these items is displayed as historically important in its own right. And every item tells a story.

1. Write down three medical things you find that are important for keeping people healthy.

**Answers will vary.**

2. Find and write down the names of three things you and your family have used for entertainment or a hobby or on vacation.

**Answers will vary.**

## The Delicate Balance: Human Values and Iowa's Natural Resources

*Location: 1st floor - entrance near Mammoth exhibit.*

Iowa's environment has changed over time. Some changes to the environment happen as a result of nature's activities – such as floods and tornadoes. Other changes to the environment are brought about by human activities, such as building roads and burning fossil fuel.

1. List some ways in which nature can cause changes in the environment. Next, list ways in which human activity changes the environment.

**Nature - floods, earthquakes, erosion, landslides**

**Humans - construction, agriculture**

2. Why was coal mining so important for Iowa?

**Major industry, major source of fuel, many towns developed around coal mines; immigrants came to Iowa specifically to work in the mines.**

3. Iowa protects its wildlife and environment in various ways. Name at least two of them.

**Environmental laws; hunting and fishing limits and licenses; conservation officers; deposits on cans and bottles.**

## MUSEUM EDUCATION

Look...Listen...*Explore!*

WELCOME TO THE STATE HISTORICAL BUILDING!

This building is a place where you can journey back to Iowa's past. In the exhibits, you'll discover how Iowans used to live, and you'll see how Iowa's environment has changed over time. Look. Listen. Explore! Ask questions. Think about how the items on display relate to your life.

While you are visiting, please follow these few simple rules:

1. Stay with your group.
2. Do not touch any object, unless it is part of a hands-on activity.
3. Walk - don't run - as you tour the building.

Answer the questions in this brochure to test your skills as a time traveler!

## “You Gotta Know the Territory!”

*Location: 2nd Floor*

From 1838 to 1846, the area that was to become the state of Iowa was a territory inhabited by Native Americans and also by settlers trying to start a new life. It was a time of many changes. Look at the Native American cultures and their way of life. Look at the settlers and their way of life. Think of your own hometown. What was it like 150 years ago? When did your family come to Iowa?

1. Look at all the artifacts that show the different responsibilities of the Native American women. Name three of those responsibilities.

**Scraping and tanning hides, making clothes, farming, preparing food, caring for children, gathering food, teaching the ways of life and culture.**

2. Look at the section named “Never Done.” What activities did these women do in the house and on the farm?

**Cooking, canning, gardening, spinning, health care, child care.**

3. The section named “Urban Frontier” explains how three early Iowa towns developed. Match the town with the reason why it developed.

- |                  |                |
|------------------|----------------|
| 1. Keokuk (B)    | A. Army Fort   |
| 2. Dubuque (C)   | B. River town  |
| 3. Davenport (A) | C. Lead mining |

## Mammoth: Witness to Change

*Location: Atrium*

Somewhere around 10,000 years ago, the climate began warming and the Ice Age ended. As the glaciers retreated, the environment and plant and animal life changed. New hunters, human ones, arrived and brought more pressure on the mammoth and they became extinct. Mammoth fossils - their teeth and bones - have been unearthed through everyday activities of Iowans as they farm the land or dig into the earth for construction projects.

1. What other animals lived in Iowa during the time of the Mammoth?

**Bison, giant beaver, deer, elk, moose, musk oxen, horse, hare, turtle, ground sloth, peccary, camel, mastodon.**

2. Why do you think the mammoth became extinct?

**Climate changed (not as cold), human hunters, less food and competition for food with other animals like bison, didn't have babies very frequently, disease.**

## Free Time

This is your free time! Here's a few of the things you can do to fill this time:

- Explore the Patten's Neighborhood exhibit in the atrium on the 1st Floor and don't forget to check out the smaller displays near the Education area.
- Visit the *Where's Floppy?* and *Medical Marvels* exhibits located near the Grand Staircase. Look in the Resource Center for special displays.
- Wander through *Collection Close-up*, a display area near the entrance of the Museum Store.
- See the “built in Iowa” 1906 Mason car under the Grand Staircase.
- Use the restrooms and water fountains.
- Visit the Museum Store. Please remember that all student groups must be accompanied by an adult in the Store.
